

# AutoSPREADER

## Flange Spreader

- **10,000 lb of force per spreader**
- **Hydraulic & manual models**
- **Lightweight: Hydraulic 12 lb & Manual 13.5 lb**
- **3" gap achieved in a single pass**
- **Fast & easy**
- **Only requires 3/32" gap to insert**

### **Strength when strength matters!**

Opening a flange for gasket replacement has never been considered easy work... until now.

FACTORQ's AutoSPREADER flange spreaders make quick work of spreading flanges by offering quick, one-time flange insertion. That's it!

By simply inserting the serrated jaws between the flanges and using either a hydraulic pump or turning the ratchet handle (depending on model), you can separate the flanges and create a 3-inch gap in one pass.

NO prying! NO re-insertion! NO drift! NO loose parts!

AutoSPREADERS are fast, fit all flanges, offer parallel separation and are lightweight enough to go virtually anywhere. Use them any place a prying tool goes but with better results, such as:

- Lifting
- Leveling
- Lowering
- Aligning

Sold in duo sets and as singles, the AutoSPREADER provides 10,000 lb of force per spreader and only needs 3/32 of an inch to achieve insertion. Use multiple flange spreaders to achieve even more spreading force.

### **Make quick work of gasket replacement.**

By using two AutoSPREADERS on a flange, you get up to 20,000 lb of safe and parallel separation for maintenance and replacement of any size gasket.

When safety blocks are inserted into the gap of the flange, the AutoSPREADER closes and the load is transferred to the blocks, enabling the operator to work safely.

Each safety block offers the choice of 1, 2 or 3-inch flange separation and the safety of an easy grip handle – even while wearing gloves.

### **Applications and specifications**

AutoSPREADERS are great for everything from gasket replacement on flanges to standard leveling and everything in between. FACTORQ

flange spreaders are perfect for:

- Gasket maintenance
- Separating manways
- Bearing removal
- Impeller removal
- Leveling machinery

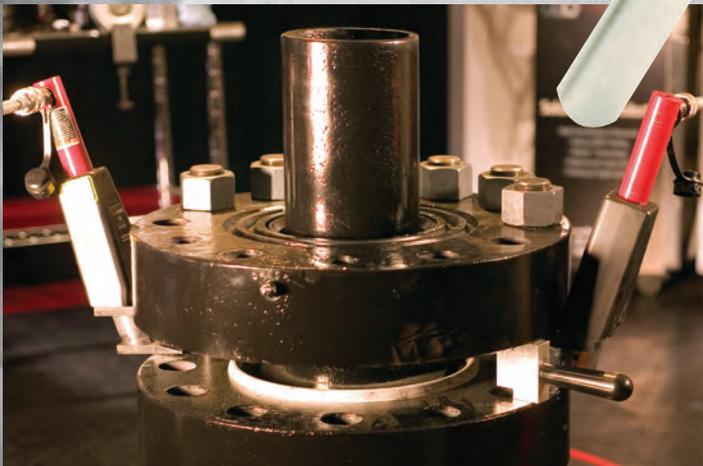

Need an AutoSPREADER fast? No problem. FACTORQ flange spreaders are part of the FastSHIP Program. Orders placed online ship the next business day, and same day shipping is available upon request (phone call required).
